HOW TO DRAW BLOOD

Apply the **tourniquet** on the **upper** part of the patient's **arm**.

Disinfect the arm with an **alcohol swab**.

Take a sterile **syringe**.

Remove the **needle cap.**

Align the **hole** in the **needle** with the **scale** for an easy **reading**.

Insert the needle into the **vein**.

Pull on the **plunger** to start **drawing blood**.

Release the tourniquet.

Apply a **gauze pad** onto the injection site and remove the needle.

Empty the blood in a vaccutainer and **discard** the needle into a **suitable container**.

(to) apply	poser
tourniquet	garrot
upper	supérieur
arm	bras
alcohol swab	tampon imbibé d'alcool
syringe	seringue
(to) remove	retirer
