

Worksheet n°54

http://www.cbsnews.com/video/watch/?id=4615368n

Name of the person: What is he taking part in? Condition: Since when? Why? What happened to him when he was in College? Who was he referred to? Why? How has the condition evolved since the 1950s? What is the current life expectancy for this disease? What is the main reason for this? What is the other reason why the man is still alive? What is his goal today? Main course. How does he feel along the way? What keeps him going? Finally, what will the man need? What is the hope about this disease? What is the hope about this disease?	Starters.	Age:
Condition: Since when? What happened to him when he was in College? Who was he referred to? Why? How has the condition evolved since the 1950s? What is the current life expectancy for this disease? What is the main reason for this? What is the other reason why the man is still alive? What is his goal today? What is his goal today? Finally, what will the man need? When was the gene causing this condition discovered?	Name of the person:	What is his exact problem?
What happened to him when he was in College? Who was he referred to? Why? How has the condition evolved since the 1950s? What is the current life expectancy for this disease? What is the main reason for this? What is the other reason why the man is still alive? What is his goal today? What is his goal today? Finally, what will the man need? When was the gene causing this condition discovered?	What is he taking part in?	
What happened to him when he was in College?		Condition:
What happened to him when he was in College? Who was he referred to? Why? How has the condition evolved since the 1950s? What is the current life expectancy for this disease? What is the main reason for this? What is the other reason why the man is still alive? What is his goal today? What is his goal today? Finally, what will the man need? When was the gene causing this condition discovered?	Why?	Since when?
What happened to him when he was in College? Who was he referred to? Why? How has the condition evolved since the 1950s? What is the current life expectancy for this disease? What is the main reason for this? What is the other reason why the man is still alive? What is his goal today? What is his goal today? Finally, what will the man need? When was the gene causing this condition discovered?		
What happened to him when he was in College? Who was he referred to? Why? How has the condition evolved since the 1950s? What is the current life expectancy for this disease? What is the main reason for this? What is the other reason why the man is still alive? What is his goal today? What is his goal today? Finally, what will the man need? When was the gene causing this condition discovered?		
Who was he referred to?	What happened to him when he was in	
Who was he referred to?	what happened to him when he was in	•
What is the current life expectancy for this disease? What is the main reason for this? What is the other reason why the man is still alive? What is his goal today? Main course. How does he feel along the way? What keeps him going? Finally, what will the man need? When was the gene causing this condition discovered?	Who was he referred to?	
What is the current life expectancy for this disease?	Why?	
What is the current life expectancy for this disease? What is the main reason for this? What is the other reason why the man is still alive? What is his goal today? Main course. How does he feel along the way? What keeps him going? Finally, what will the man need? When was the gene causing this condition discovered?	/.	
What is the current life expectancy for this disease? What is the main reason for this? What is the other reason why the man is still alive? What is his goal today? Main course. How does he feel along the way? What keeps him going? Finally, what will the man need? When was the gene causing this condition discovered?		
What is the current life expectancy for this disease? What is the main reason for this? What is the other reason why the man is still alive? What is his goal today? Main course. How does he feel along the way? What keeps him going? Finally, what will the man need? When was the gene causing this condition discovered?		
What is the current life expectancy for this disease? What is the main reason for this? What is the other reason why the man is still alive? What is his goal today? Main course. How does he feel along the way? What keeps him going? Finally, what will the man need? When was the gene causing this condition discovered?	How has the condition evolved since th	
What is the current life expectancy for this disease? What is the main reason for this? What is the other reason why the man is still alive? What is his goal today? Main course. How does he feel along the way? What keeps him going? Finally, what will the man need? When was the gene causing this condition discovered?	}	
What is the current life expectancy for this disease? What is the main reason for this? What is the other reason why the man is still alive? What is his goal today? Main course. How does he feel along the way? What keeps him going? Finally, what will the man need? When was the gene causing this condition discovered?		
What is the current life expectancy for this disease? What is the main reason for this? What is the other reason why the man is still alive? What is his goal today? Main course. How does he feel along the way? What keeps him going? Finally, what will the man need? When was the gene causing this condition discovered?		
What is the main reason for this?		
What is the other reason why the man is still alive? What is his goal today? Main course. How does he feel along the way? What keeps him going? Finally, what will the man need? When was the gene causing this condition discovered?	What is the current life expectancy for	this disease?
What is his goal today? Main course. How does he feel along the way? What keeps him going? Finally, what will the man need? When was the gene causing this condition discovered?		
What is his goal today? Main course. How does he feel along the way? What keeps him going? Finally, what will the man need? When was the gene causing this condition discovered?	, , , , , , , , , , , , , , , , , , ,	
What is his goal today? Main course. How does he feel along the way? What keeps him going? Finally, what will the man need? When was the gene causing this condition discovered?		
What is his goal today? Main course. How does he feel along the way? What keeps him going? Finally, what will the man need? When was the gene causing this condition discovered?		
What is his goal today? Main course. How does he feel along the way? What keeps him going? Finally, what will the man need? When was the gene causing this condition discovered?	<u>,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,</u>	
What is his goal today? Main course. How does he feel along the way? What keeps him going? Finally, what will the man need? When was the gene causing this condition discovered?	What is the other reason why the man	is still alive?
Main course. How does he feel along the way?		
How does he feel along the way?	What is his goal today?	
How does he feel along the way?		
How does he feel along the way?		
How does he feel along the way?		
What keeps him going?		
Finally, what will the man need?		
When was the gene causing this condition discovered?	what keeps him going :	
When was the gene causing this condition discovered?	}	
When was the gene causing this condition discovered?	, > <u>^</u>	
	Finally, what will the man need?	
	NA/L	<u></u>
What is the hope about this disease?	vynen was the gene causing this conditi	on discovered:
What is the hope about this disease?	, ,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,	
	What is the hope about this disease?	
	} 	

•	man's condition, how can one explain his participation in such an event? How good
	

Dessert.

Now try and tell a friend or colleague about this TV report, using the pieces of information from the worksheet above.

Topping.

What are the latest findings about this genetic disease?
