What is the dilemma about?

How quickly can our genome be sequenced? What are the consequences?

Katrina.

Who is she? What happened to her son?

The study.

What did researchers design? What for?

How did Katrina first react?

What were the findings of the study?

What are researchers favourable of?

Why are doctors cautious about this?

What other consequences could this have on people's lives?

Topping.

What is your opinion on this issue?

Is such research done in your country?

Do you want to know what's in store for you or your children in the decades to come?

How would you react to this question?
